## ABOUT

I am a University of Nebraska at Kearney student pursuing a Bachelor's degree in both multimedia and information technology with a graduation date of May 2018. I am interested in pursuing a career that will allow me to use my education to market companies through building brand recognition. It is important to me to be up-to-date with my coding skills so that I am a strong team member for the brand I represent. I currently have skills in Java, Javascript, and jQuery. One of my former websites, received third place in a national competition.

My skills include excellent customer service, time management, business office management, and social media management. Other things I enjoy: a good cup of coffee, a great book, and using my creative mind.

## EXPERIENCE
